

Policy for Quality, Environmental Protection and Health and Safety at Work

The satisfaction of our Customers - Investors is our interest!

The management of DG BETON AD Skopje is dedicated to continuous improvement of the Management system for Quality, Environmental protection and Health and Safety at work.

We achieve that by:

- Meeting and exceeding customers' demands and expectation.
 - Professional relationship with the customers and fulfillment of the agreed deadlines.
 - Permanent training of the staff, capabilities development, reinforce employees responsibility and creating partnership
 - Respecting of the effective laws and demands, International standards (ISO 9001:2008; ISO 14001:2004 and OHSAS 18001:2007) and contractual requirements, compliance with EU directives and international conventions on the locations of foreign markets in which we operate.
 - Providing health working environment and training to attain the employees awareness for environmental protection and health and safety at work.
 - Taking care of the environment and work place through determination and measuring the pollution from the work processes
 - Permanent improvement of the management system for quality, environment and health and safety at work (ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007)
- The Policy for quality, environmental protection and health and safety at work which is a base for determination and review of the goals for quality and social and particular goals for the environment and health and safety at work
- Establishing of effective communication with all concerned parties in order to make an exchange of the information regarding quality, environmental protection, health and safety at work
 - Creating safe working environment against injuries at work and providing personal protection equipment for all employees.

The Policy for quality, environmental protection and health and safety at work is available to the public and it represents an obligation for the employees.

Our motto is:

Better, Stronger, Safer and Most Modern!

Our vision is:

To create modern, spatial esthetic structure, which with its architectonic and constructive solutions are embedded in the most modern trends in the civil construction in our country and abroad.
